

Pipeline systems

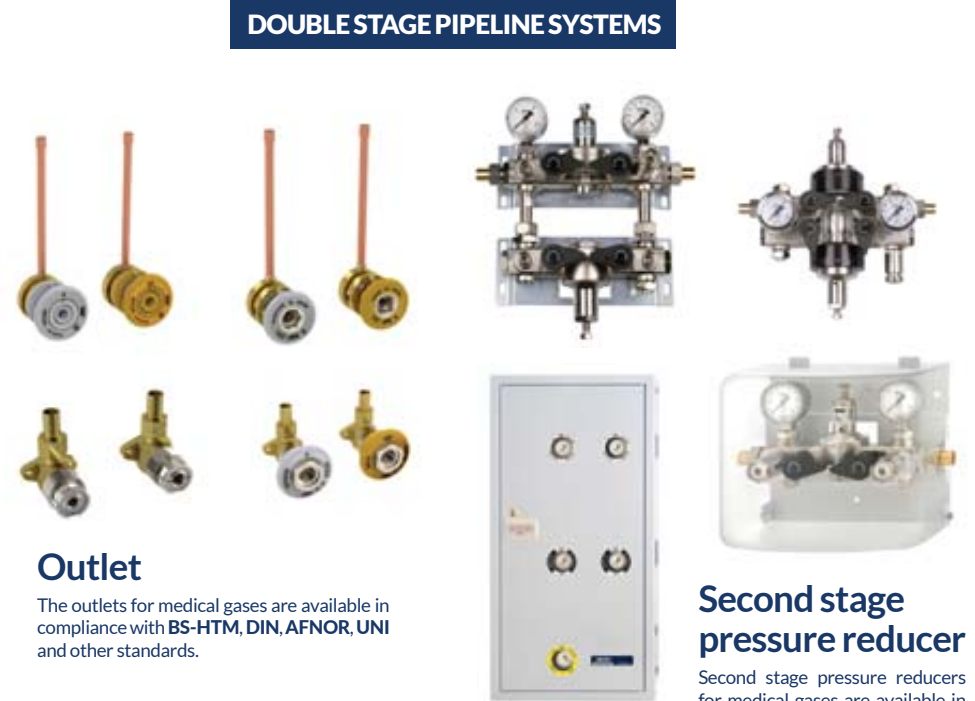

Delta P pipeline system devices are compliant with ISO and HTM standards, they keep medical gas supplies in hospitals safely under control.

SINGLE STAGE PIPELINE SYSTEMS

Area Valves (AVSU)

Area valves (AVSU) according to ISO and HTM standards, guarantee total control of the pipeline system up to the outlets.

DOUBLE STAGE PIPELINE SYSTEMS

Outlet

The outlets for medical gases are available in compliance with BS-HTM, DIN, AFNOR, UNI and other standards.

Second stage pressure reducer

Second stage pressure reducers for medical gases are available in different models, single and double, with flush metal box or wall surface clear cover.
